

**Task:**

Hazard identified	Who is affected by hazard?	Control measures already in place	Likelihood	Severity	Risk rating	Further actions required to reduce risk	Residual risk	Person responsible for actions required to reduce risk

Review date ..... Authorised by..... Issued to.....

<b>Likelihood</b>	<b>Severity</b>	<b>Risk</b>
1 Unlikely	1 Minor	1-2 Low, acceptable
2 Possible	2 major/ 3 day	3-5 Medium, further controls required
3 Likely	3 Fatal	6-9 High, major additional controls required

These risk ratings provide a basic tool to help prioritise the controls required for the hazards identified in this assessment. They do not provide a definitive statement of the magnitude of the risk for any given hazard.
